Application Overview

Social Crate (working title) is an application where Local Crate's suppliers, farmers, growers, and makers (all referred to as 'Partners') can share their stories and photos.

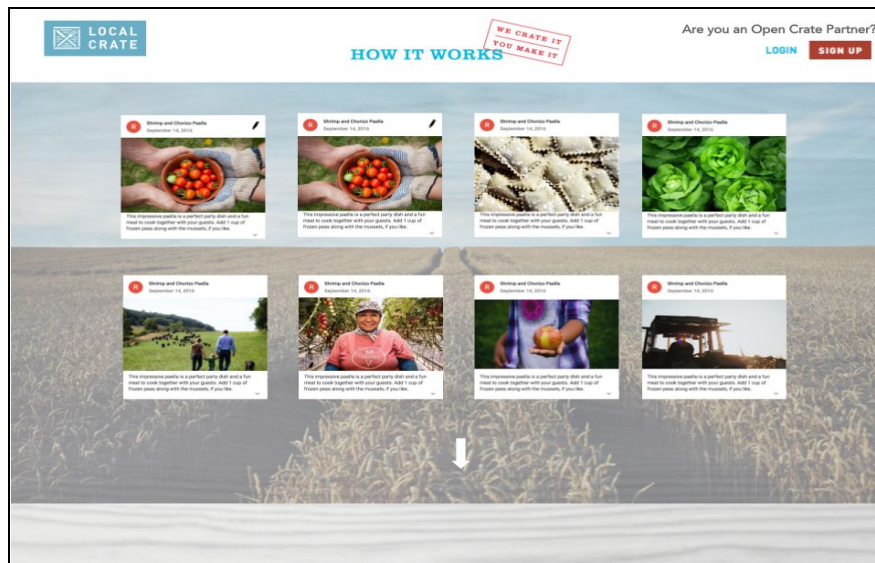

An admin user (Local Crate employee) enters emails for users who are then sent a link to sign up. Users can then define their profile with a picture, a description of their operation and a listing of the items they create and supply to Local Crate. Users can also create a post which is publicly viewable in a Instagram like "feed" alongside other users' postings. Each posting will include a photo and short description that tells the story of their product, the journey to Local Crate products, or general updates from their organization. The admin user will have the ability to flag a post. This post will then not be publicly visible. Additionally, a public viewer can view a partner's profile page and posts by clicking on their avatar in the upper-left of each card.
